(initialized repos only)

Glo Issue Boards

Why Choose the GitKraken Git Client?

INTUITIVE VISUAL INTERFACE

1 Clearly track code changes, revisions and commits to avoid overwriting or disrupting workflow

4 Utilize Gitflow, LFS, Git Hooks, Submodules and GPG Commit Signing

7 Push, pull/fetch, branch, stash, undo or redo with 1 click

2 Hide and solo branches in the commit graph to reduce visual clutter

5 Perform Git actions via drag-and-drop or with right-click > context menu

8 Easily access multiple repos by storing them in tabs

3 Use Fuzzy Finder to search commits/files and open files/repos

6 Use keyboard shortcuts to quickly navigate and perform repo actions

9 Store Glo Boards in a tab to quickly reference your tasks and synced GitHub Issues

BRANCHING & MERGING

1 Drag and drop to merge and rebase branches. Utilize Interactive Rebase mode for greater control

2 Use the built-in merge tool to resolve conflicts and edit the output in app

3 Quickly open conflicts in one of the many external merge tools that are supported

BUILT-IN CODE EDITOR

1 Compare file changes with Hunk, Inline or Split Diff View

2 See syntax highlighting and a file mini map

3 Search within files and edit files directly

GIT HOSTING INTEGRATIONS

 GitHub.com + Enterprise

 Bitbucket.org + Server

 GitLab.com + Self-Hosted

 Azure DevOps

1 Easily add and manage remote repositories

2 Create PRs and view the status, assignees and reviewers without leaving the client

3 Generate and configure SSH keys

AVAILABLE FOR OFFLINE ENVIRONMENTS

1 Installed on your servers for use behind a firewall

2 LDAP/AD integration for easy user license management

3 Full IT control over release updates
